

Should Passive House be a New Multifamily Reach Goal for Vermont?

Thursday June 26 2025 from 12 PM to 1 PM

Webinar Presented by Karen Bushey – Efficiency VT

Efficiency Vermont High-Performance (EVTHP) is the current standard for the Efficiency Vermont Multifamily New Construction (MFNC) program.

Karen Bushey, Senior Energy Consultant with Efficiency Vermont will be presenting on her research study comparing actual performance data of six EVTHP MFNC buildings and four Phius certified MFNC Passive House (PH) buildings, all ten located in climate Zone 6.

Among the findings is an average of 19% operational energy savings for PH projects over EVTHP. Other findings show the consistency of results in the PH performance-based projects compared to the prescriptive-based EVTHP projects.

Hosted by VT Passive House
